BAUR Newsletter

Issue March 2014

Dear BAUR Partner, Dear Customer!

BAUR is kicking off the new year by expanding its portfolio and from springtime onwards, it will be supplying products with DAC technology for cable testing in the high-voltage range. Other product news includes the new DPA 60 C device for insulating oil testing and the BM 30 ground microphone. You can also find out more about our new YouTube channel.

Happy reading!

BAUR expands its portfolio with devices for high-voltage cable testing Strategic partnership between BAUR and onsite high voltage international

Technological pioneer BAUR collaborates with onsite high voltage international. BAUR now also supplies time-saving, exceptionally easy to handle and comprehensive damped-AC technology (DAC) for (E)HV cables.
