BAUR Newsletter

Issue May 2014

Dear BAUR Partner, Dear Customer!

In this Newsletter, BAUR promotes VLF sine as a universal voltage source, which appears as truesinus® in BAUR products. For more in-depth information, please download a paper on this topic. With its acquisition of seven cable test vans, even ENEL relies on truesinus®. In addition, this Newsletter also gives you an overview of the production unit in Sulz (Austria) as well as updates about our events worldwide.

Happy reading!

BAUR truesinus®

Voltage source for cable testing and diagnostics of medium-voltage cables

The VLF sine voltage source has proven to be an all-rounder during cable testing and diagnostics. A voltage source such as the BAUR truesinus® is suitable for all relevant daily tasks, is light weight and provides reliable results. Users of VLF devices thus benefit from measurement results that can be collected without major effort. The practical advantages are further highlighted on comparison with other voltage sources.
